

# TELEPHONE INTERFACES

## Door phone/telephone interfaces

This device is used to allow communication, also at the same time, with a dial line and a loudspeaking unit using a single telephone and allowing to open the door. With a cordless phone, you can take incoming calls from anywhere in your home, e.g. from the garden, the balcony or the loft.

Specifically, the new door phone interface 1332/40 offers various installation solutions: direct power from loudspeaking unit, management of two door units, door unit call confirmation tone, etc.

1332/40

### 1332/40

#### Door phone/telephone interface

Interface device for telephone lines and door phone systems and replaces the 1332/30. One device connected to an analogue dial line and 4+n door phone system (this device must be connected to other dedicated interfaces).

Allows to manage telephone and door phone calls to a single telephone terminal.

Set up for connecting to two loudspeaking units and equipped with two relays for opening the door or for auxiliary services. Supplies power (+6Vdc) to a PE and different operating modes, programmable directly from the connected phone.

Power: 12 Vac. Minimum consumption: 3/10VA. Installation: DIN bar.

Dimensions: 108 (W) x 90 (H) x 55 (D) mm (6 DIN modules).
