- **Management of two electric locks**
- **Selectable ring tones**
- **Surveillance camera scan cycle**
- **Mailbox query function**
- **Automatic door opener function**
- **Mute function with LED indicator**
- **Audio by means of two speakers**

Plenty of room for pictures with Modò. With a 7" colour display combined with the possibility of cyclically selecting the cameras to which the IPervice can be connected, this monitor guarantees effective monitoring of all areas under video surveillance. Furthermore, the integrated video door phone mailbox system shows messages left by visitors who called the users while they were away. Modò is performance leader also for other video door phone functions: intercom calls, including calls to switchboard, have no limit and each name can be directly called up using the virtual keypad on screen, for additional practicality. Furthermore, audio feed to the outside can be cut off during hands-free communications for additional conversation privacy. Audio efficiency is optimal using two high power speakers. Audio management is free offering several ring tones to choose from. The ringer can be turned off using the mute function with LED indicator.

There is more freedom and versatility: this monitor can autonomously manage two electric locks. Modo implements state-of-the-art technology in minimum design at home: only one frame, with smooth shapes and careful choice of materials.

Technology within hand's reach. Function management is simple with Modo. The touch-screen menu guides all operations. A user-friendly icon system facilitates command use with the same ease as a mobile phone.
