- 4" colour TFT display
- Handset or hands-free version
- Hands-free version installable on wall or flush mounted
- 60 Hz version too
- Ready for use with hearing aids

Utopia is an outstanding monitor, boasting a great care for details both in design and functions. Two versions: with hand-set or hands-free; easy accessible main buttons and controls for setting colour, contrast and brightness located under a flap, to preserve its clean look. The 4" TFT display ensures a bright and perfect readout at any angle. The loudspeaking unit is separate from the handset speaker; the volume can be adjusted (Mute function indicated by a green led). 1037/17 is preset for integrated hearing aid setup (pursuant to the prevailing rules); the hands-free 1037/37 becomes suitable for this use by simply installing kit 1037/137.
